PROPAGATION AND DISTRIBUTION OF FISHES FROM

HATCHERIES AND FISHERY RESOURCE MANAGEMENT FOR FY 1983

INTRODUCTION

This report on fishes and fish eggs distributed by national fish hatcheries for the period October 1, 1982, to September 30, 1983, is a continuation of a series of publications issued since 1872. Records of hatchery outputs were published in the annual Commissioner's Report of the U.S. Commission of Fish and Fisheries through 1903 and in the Annual Report of the Commissioner of Fisheries of the U.S. Department of Commerce, until 1940. From 1941 through 1962, these tabulations were presented as "Statistical Digest". Beginning in 1963, these reports became known as the"Fish Distribution Report" Report No. 2 for 1965 and 1966 established the fiscal year as the period of coverage. In 1976, the fiscal year time frame was changed from July through June to October through September. Report No.11 recorded fish distribution for the period of July 1, 1975, through September 20, 1976, which included the 3 month transition quarter--July, August, and September 1976. All future fish distribution reports will coincide with the October through September fiscal year.

The Hatcheries and Fishery Resources Management system produces primarily salmon, trout, catfish, pike, bass, and sunfish. Several additional species of fish are produced and collected for use as test animals in various research projects.

The goal of the Fish and Wildlife Service is to conserve the Nation's freshwater and anadromous fishery resources for the benefit of the people. Distribution of fish from the Federal hatchery system assists in meeting this goal in accordance with the following objectives:

a. To restore and/or maintain existing freshwater and anadromous fishery resources in suitable streams, rivers or lakes of the United States.

b. To restore fishery resources destroyed or depleted through human activities.

c. To aid States in the management and development of depleted fishery resources.

d. To protect the Nation's fisheries by listing the introduction or distribution of diseased fish and their attendent pathogens.

e. To control the introduction and population levels of exotic species damaging to the fishery resources or aquatic ecosystem.

f. To carry out responsibilities established by treaties and other commitments of the Federal Government to maintain and to restore fishery resources.

It is the policy of the Fish and Wildlife Service to allocate or distribute the output of its Fish Hatcheries in the following order of priority:

(1) Coastal anadromous fishery programs.

(2) Great Lakes fisheries program.

(3) Federal Research programs.

(4) Threatened and endangered species program.

(5) Federal Interagency commitments.

(6) Mitigation for Federal water projects.

(7) Special requests - i.e., small numbers of eggs for university research or for establishing new broodstock.

(8) Foreign requests.

(9) State requests.

(10) Private requests.

The present system for allocating fish to the several classes of water has been used by the Federal Government since 1949. The records system used to report stocking of fish was completely revised as of January 1, 1966 to provide more current data and better identification of the various program areas. As a result of the development of fishery management programs, long-range stocking requirements have been determined in many States and Federal areas. Fish stocking requests are now provided by fishery program managers for the various management programs, and it is no longer necessary or desirable to receive individual stocking requests for public waters. Fish are allocated, however, on an individual basis for newly created waters and special programs that meet the present Fish and Wildlife Service criteria for stocking.

The Fish and Wildlife Service groups the States into seven regions.

Region 1 -- Lloyd 500 Building, Suite 1692, 500 NE. Multnomah Street, Portland, Oregon 97232 - California, Hawaii, Idaho, Nevada, Oregon, and Washington.

Region 2 -- U.S. Courthouse & Federal Building, 500 Gold Street, SW (P.O. Box 1306), Albuquerque, New Mexico 87103 - Arizona, New Mexico, Oklahoma, and Texas.

Region 3 -- Federal Building, Fort Snelling, Twin Cities, Minnesota 55111 - Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, and Wisconsin.

Region 4 -- Richard B. Russell Federal Building, 75 Spring Street, SW., Atlanta, Georgia 30303 - Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Puerto Rico, and the Virgin Islands.

Region 5 -- One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158 - Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and Washington, D.C.

Region 6 -- Denver Federal Center,(P.O. Box 25486), Denver, Colorado 80225 - Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah, and Wyoming.

Region 7 -- 1011 E. Tudor Road, Anchorage, Alaska 99503 - Alaska.

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interest of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.
